

THE WORLD COMES HERE.
TMS 2025
154th Annual Meeting & Exhibition

March 23–27, 2025
MGM Grand Las Vegas
Hotel & Casino
Las Vegas, Nevada, USA
#TMSAnnualMeeting

SUBMIT AN ABSTRACT FOR THE FOLLOWING TMS2025 SYMPOSIUM:

LIGHT METALS

Electrode Technology for Aluminum Production

This is an excellent opportunity to interact with experts from the Light Metals industry and academia from all over the world and get the latest update on key issues in the industry. The importance of changes in anode coke supply, increased cell size with larger anodes and cathodes, and cathode wear issues are just some of the issues facing the industry.

You are invited to submit papers of fundamental and applied research in the following subject areas:

- Upstream Production of Anode and Cathode Carbon Materials
- Production and properties of Anode and Cathode Raw Materials, Anode Cover Materials
- Pitch and Coke Mixing, Anode Forming and Anode Baking
- Anode characterization
- Paste Plant Design and Operation
- Baking Furnace Design and Operation
- Mathematical Modelling
- Application of Industry 4.0 and Big Data Analysis
- Effects of Sulfur and Impurities in Anodes
- Rodding Room Design and Operation
- Anode Quality and Performance
- Solutions for Carbon Plant Environmental Issues and Safety
- Cathode Materials and Cathode Production
- Cell Preheating and Startup (as related to electrode life)
- Cathode Wear and Wear Mechanisms
- Spent Potlining, 1st and 2nd Cut (Joint session with Aluminum Reduction)
- Anode Butts, Handling and Properties
- Inert Anode and Cathode Materials, Fabrication and Performance

Note regarding publication: Authors seeking an oral presentation opportunity must submit a manuscript for the Light Metals proceedings or be accepted for publication in a TMS journal.

ORGANIZERS

Egil Skybakmoen, SINTEF; Les Edwards, Rain Carbon Inc.

SYMPOSIUM SPONSORS

TMS Light Metals Division, TMS Aluminum Committee
